

Himanshu Chaudhary

Full Stack Developer

+91 6398776703 | himanshuatwork02@gmail.com | linkedin.com/in/himanshu1081 | github.com/himanshu1081

Summary

Full Stack Developer specializing in MERN stack, AI integrations, and scalable web applications. Experienced in building production-ready systems using React.js, Node.js, RESTful APIs, and LLM-based chatbot solutions. Familiar with Agile workflows, version control (Git), and CI/CD pipelines via Docker and Vercel. Strong focus on performance optimization, responsive design, and clean architecture.

Experience

Full Stack Developer Intern

Aug 2025 – Apr 2026

Mindmesh Consulting Ltd

- Built AI-powered chatbot systems using LangChain, Retrieval-Augmented Generation (RAG), and OpenAI/Groq APIs with Node.js backend services and RESTful APIs.
- Developed backend APIs and responsive React.js interfaces for real-time AI chatbot interactions.
- Automated customer support workflows using RAG-based contextual retrieval, reducing manual support workload by approximately 30%.

Freelance Frontend Developer

Feb 2026

Balkan Cleaning

- Developed and deployed a production-ready business website using React.js (Vite) and Tailwind CSS with responsive design.
- Optimized performance across devices using lazy loading and asset compression, improving page load time.

Full Stack Developer Intern

Jun 2025 – Jul 2025

Innovation House Technology Pvt Ltd

- Built scalable MERN stack features with React.js frontend and Node.js/Express.js backend using Agile development practices.
- Integrated RESTful APIs and managed data flow between frontend and backend systems; used Git for version control.

Projects

MakeMyResume – AI Resume Tailoring Chrome Extension

2026

JavaScript, Docker, Chrome APIs, Groq API

github.com/himanshu1081/MakeMyResume

- Built Chrome extension that tailors resumes to job descriptions via LLM API integration, reducing customization time by 80%.
- Containerized the backend using Docker and deployed with CI/CD pipeline for consistent build and release.

Vexa – AI Chat Application

2025

Next.js, Supabase, OpenAI/Groq API

vexa4ai.vercel.app — github.com/himanshu1081/vexa

- Developed real-time AI chat app with JWT-based authentication, persistent storage, and responsive design across devices.
- Optimized message fetching using infinite scroll, reducing database load and improving query response time.

Vastora – Video Streaming Platform

2025

MERN Stack, JWT, MongoDB Aggregation

vastora.vercel.app — github.com/himanshu1081/vastora

- Built full-stack platform with JWT-based authentication, protected routes, and role-based authorization using bcrypt.
- Optimized backend queries using MongoDB aggregation pipelines, reducing data retrieval time significantly.

Technical Skills

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, RESTful API Integration, FastAPI, Python, JWT, bcrypt, OAuth, Authentication, Authorization

AI & LLM: OpenAI API, Groq API, LLM Integration, Chatbot Systems, Prompt Engineering, RAG, LangChain

Database: MongoDB, PostgreSQL, MySQL, Supabase, ChromaDB

Tools & DevOps: Git, GitHub, Docker, CI/CD, Vercel, Linux, AWS (Basics), Agile, Version Control

Achievements

Finalist – Climate Data Hackathon (EPAM Gurugram)

2026

Ranked among top teams out of 170+ participants across three evaluation rounds. Built **CleanAir Club**, a climate-tech platform leveraging AQI data, AI-based commute detection, and anomaly detection for fraud prevention.

Education

Bachelor of Computer Applications (BCA)

2023 – 2026

Jaypee Institute of Information Technology, Noida

Relevant coursework: Data Structures, Algorithms, Database Management Systems, Operating Systems, Computer Networks
