Experience

Backend Engineer Intern

Aug 2025 – April 2026

Mindmesh Consulting Ltd

- Built and deployed **REST APIs for AI-powered chatbot systems**, integrating Node.js, **LangChain**, **RAG**, and OpenAI/Groq APIs to support contextual AI responses.
- Developed **RAG-based retrieval pipelines** that connected chatbot queries with internal knowledge sources, improving response relevance and reducing reliance on manual customer support.
- Implemented **API rate limiting at 20 requests/minute per client** to prevent excessive usage, protect LLM endpoints from abuse, and maintain reliable chatbot performance.
- Automated customer-support workflows using **retrieval-augmented generation**, reducing manual support workload by **30%**.

Backend Engineer Intern

May 2025

Innovation House Technology Pvt Ltd

- Developed and delivered a production business website using **React.js**, **Vite**, and **Tailwind CSS**, with responsive layouts optimized across desktop and mobile devices.
- Improved page performance through **lazy loading**, asset compression, and optimized frontend delivery, reducing unnecessary network payloads and improving load performance.

Projects

Portfolio RAG ChatBot

Tools & Technologies : FastAPI, LangChain, RAG, ChromaDB, React.js

[GitHub - Live](#)

- Integrated Groq-hosted Llama 3.3 70B with Gemini embeddings and implemented top-k vector retrieval for contextual response generation.
- Hardened API endpoints with **rate limiting**, prompt-injection defenses, and an authenticated admin endpoint for knowledge-base re-ingestion.

MakeMyResume

Tools & Technologies : Javascript, Groq, Docker, Node.js

[GitHub](#)

- Built a Chrome extension that tailors resumes to job descriptions via LLM API integration, cutting customization time by 80%.
- Containerized the backend with Docker and deployed via a CI/CD pipeline for consistent builds and releases

Technical Skills

- **Programming Languages** : JavaScript, TypeScript, Python, Java, SQL
- **Backend Framework** : Node.js, Express.js, FastAPI, RESTful APIs, API Integration, Authentication, Authorization, JWT, OAuth, bcrypt
- **AI & LLM**: LangChain, RAG, OpenAI API, Groq API, LLM Integration, Prompt Engineering, Vector Search, Gemini Embeddings
- **Databases**: MongoDB, PostgreSQL, MySQL, Supabase, ChromaDB
- **DevOps & Tools**: Docker, CI/CD, Git, GitHub, Linux, Vercel, AWS (Basics), Agile

Achievements

Finalist – Climate Data Hackathon (EPAM Gurugram)

2026

Ranked among the top teams out of **170+ participants** across three evaluation rounds. Built Clean Air Club, a climate tech platform leveraging AQI data, AI-based commute detection, and anomaly detection for fraud prevention.

Education

Bachelor of Computer Applications (BCA)

2023 – 2026

Jaypee Institute of Information Technology, Noida
